

## Bushfire Attack Level (BAL) Assessment Report for Brightwood Estate, Baldivis

#### **Site Details**

Address: Brightwood Estate, Baldivis

Stage 6 – Lots 214, 215, 216, 221, 222, 223, 245, 246, 247, 253, 254

Suburb:BaldivisStateWestern Australia

**Local Government Area:** City of Rockingham

Description of building works: Residential Development

Report details			
Report/Job number:	16887	Report version:	v2
Assessment date:	16 September 2021	Report date:	17 September 2021
Author:	James Leonard	Review:	Daniel Panickar
			(BPAD Level 3 – 37802)

## SITE ASSESSMENT AND SITE PLAN

The assessment of the 11 subject lots was undertaken on 5 August 2020 and reassessed on 16 September 2021 for the purpose of determining the Bushfire Attack Level (BAL) in accordance with *Australian Standard AS 3959:2018 Construction of Buildings in Bushfire Prone Areas* (SA 2018) Simplified Procedure (Method 1). An overview of the site is presented in Figure 1.

#### **VEGETATION CLASSIFICATION**

All vegetation within 100 m of the 11 subject lots was classified in accordance with Clause 2.2.3 of AS 3959:2018. Each distinguishable vegetation class with the potential to determine the BAL is identified below and presented in Figure 1.

It is currently assumed that areas of landscaped vegetation within the site and assessment area will be managed and maintained by Parcel Property (the developer) until replaced by residential dwellings and associated infrastructure or handed over to the City of Rockingham in the future.

## Plot 1 Classification or Exclusion Clause

#### Class G grassland

# Photo Point 1

Classified vegetation within this plot is predominantly grassland with foliage cover from the over storey less than 10%. Vegetation is situated on flat land.

This vegetation is located  $\geq$  50 m from the subject lot.

# Plot 1 Classification or Exclusion Clause

#### **Photo Point 2**

Classified vegetation within this plot is predominantly grassland with foliage cover from the over storey less than 10%. Vegetation is situated on flat land.

This vegetation is located  $\geq$  50 m from the subject lot.

## Plot 1 Classification or Exclusion Clause

## Photo Point 3

This plot has been excluded under Clause 2.2.3.2 (e) & (f) of AS 3959:2018. This area has been cleared for construction within Brightwood Estate.

#### Excluded under clause 2.2.3.2 (e) and (f)

## Plot 1 Classification or Exclusion Clause

# **Photo Point 4**

This plot has been excluded under Clause 2.2.3.2 (e) & (f) of AS 3959:2018. This area has been cleared for construction within Brightwood Estate.

# Excluded under clause 2.2.3.2 (e) and (f)

## RELEVANT FIRE DANGER INDEX

A blanket rating of FDI 80 is adopted for Western Australia, as outlined in Australian Standard (AS) 3959:2018 and endorsed by Australasian Fire and Emergency Service Authorities Council (AFAC).

#### POTENTIAL BUSHFIRE IMPACTS

The potential bushfire impact to the site / proposed development from each of the identified vegetation plots are identified below, Table 1 and Figure 1.

Table 1: BAL Analysis AS 3959:2018

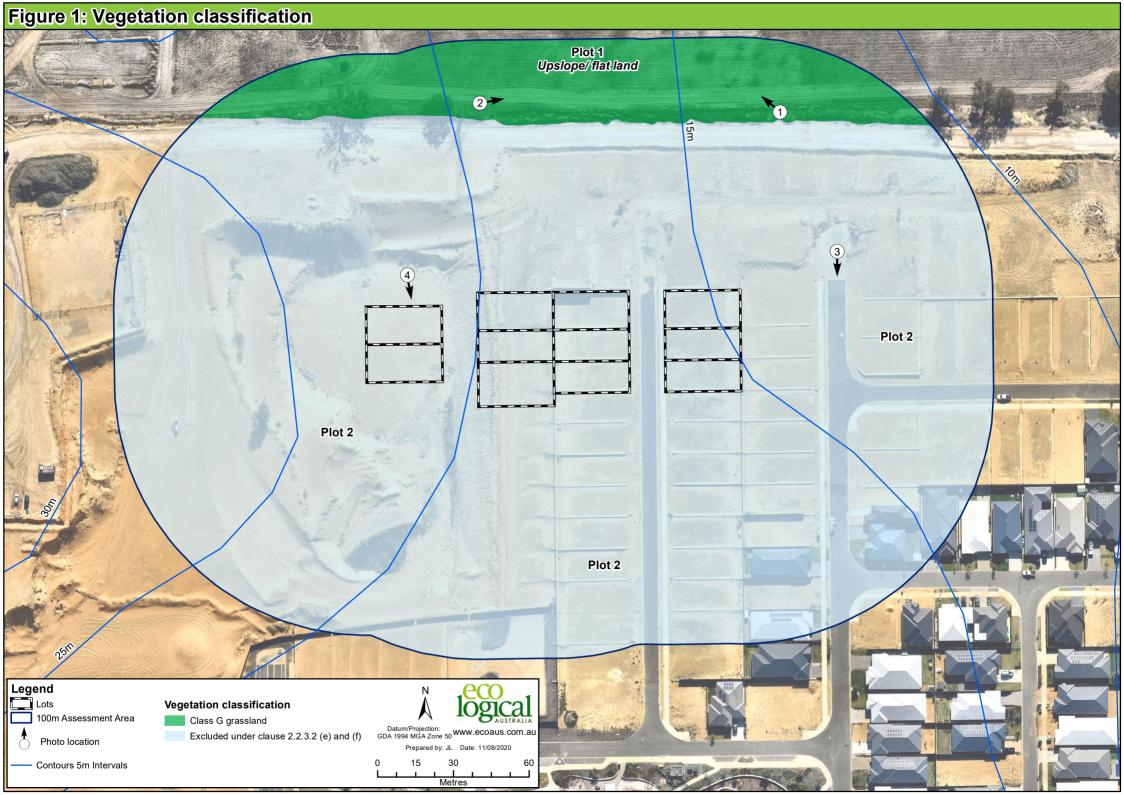

Plot	Vegetation Classification	Effective Slope	Separation distances required				
			BAL-FZ	BAL-40	BAL-29	BAL-19	BAL-12.5
1	Class G grassland	Upslope/ flat land	<6	6-<8	8-<12	12-<17	17-<50
2	Excluded under Clause 2.2.3.2 (e) & (f)	N/A	No separation distances required – BAL-LOW				

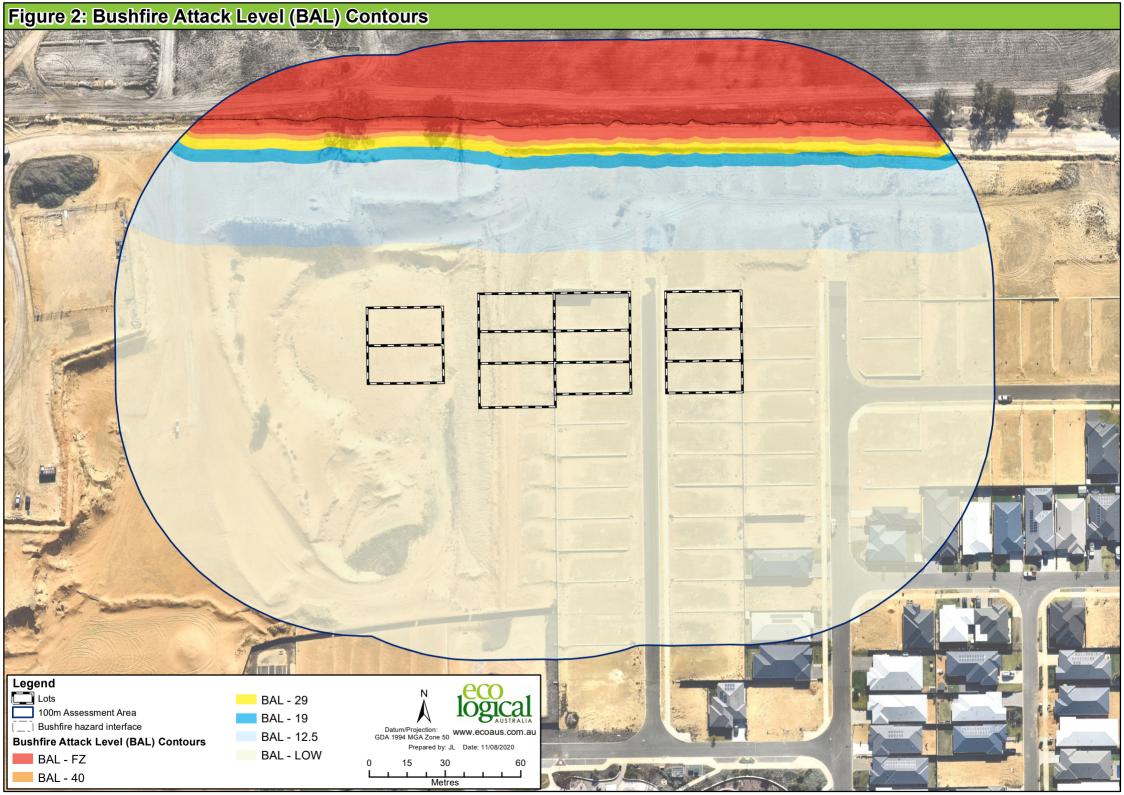

# DETERMINED BUSHFIRE ATTACK LEVEL (BAL)

The determined Bushfire Attack Level (highest BAL) for the 11 subject lots has been determined in accordance with Clause 2.2.6 of AS 3959:2018 using the above analysis, Table 2 and Figure 2.

Table 2: BAL Assessment summary

BAL	Affected lots	Construction sect AS 3959:2018	tions t	o be	consulted	in
BAL-FZ	Nil	N/A				
BAL-40	Nil	N/A				
BAL-29	Nil	N/A				
BAL-19	Nil	N/A				
BAL-12.5	Nil	N/A				
BAL-LOW	Determined Bushfire Attack Level for: Stage 6 Lots 214, 215, 216, 221, 222, 223, 245, 246, 247, 253, 254	3 and 4				

# Appendix A – Additional Information / Advisory Notes

This assessment was undertaken as per AS 3959:2018. It is important that the current version of AS 3959, is consulted for construction purposes.

This BAL rating is based on the information current at the date of this letter and is valid for 12 months from the date of this letter.

Bushfire Attack Level (BAL) as set out in the Australian Standard 3959 Construction of Buildings in Bushfire-Prone Areas (AS 3959), as referenced in the Building Code of Australia.

Bushfire Attack Level (BAL)	Classified vegetation within 100 m of the site and radiant heat flux exposure thresholds	Description of predicted bush fire attack and levels of exposure	Construction Section as per AS 3959
BAL-LOW		There is insufficient risk to warrant specific construction requirements.	4
BAL-12.5	≤12.5 kW/m2	Ember attack	3 and 5
BAL-19	>12.5 kW/m2 ≤19 kW/m2	Increasing levels of ember attack and burning debris ignited by windborne embers together with increasing radiant heat flux.	3 and 6
BAL-29	>19 kW/m2≤29 kW/m2	Increasing levels of ember attack and burning debris ignited by windborne embers together with increasing radiant heat flux	3 and 7
BAL-40	>29 kW/m2≤40 kW/m2	Increasing levels of ember attack and burning debris ignited by windborne embers together with increasing radiant heat flux with the increased likelihood of exposure to flames.	3 and 8
BAL-FZ	>40 kW/m2	Direct exposure to flames from fire front in addition to radiant heat flux and ember attack	3 and 9
